

Request Log API Pattern - Microservices 2019

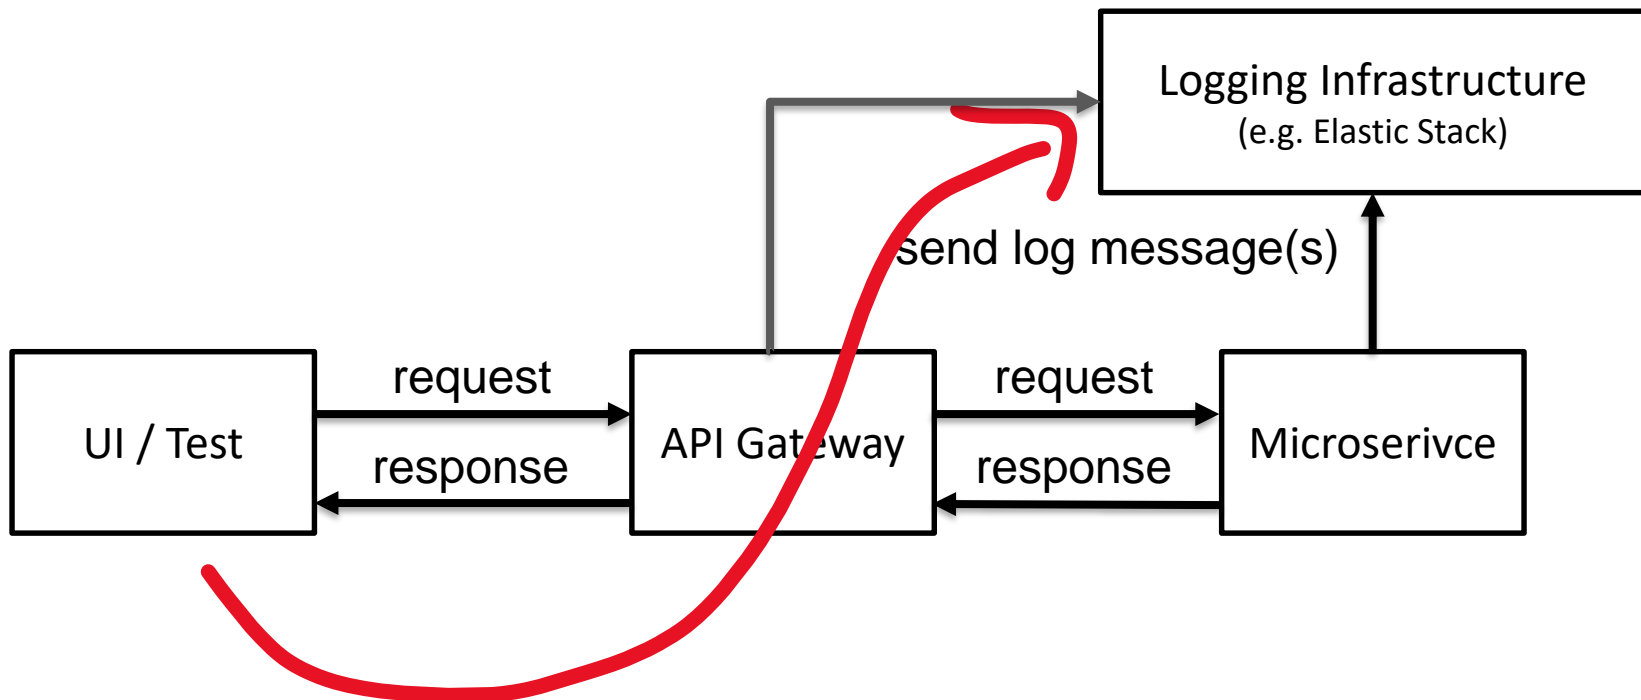

Software Engineering Research Group
Universität Kassel

Marcel Hahn
hahn@uni-kassel.de

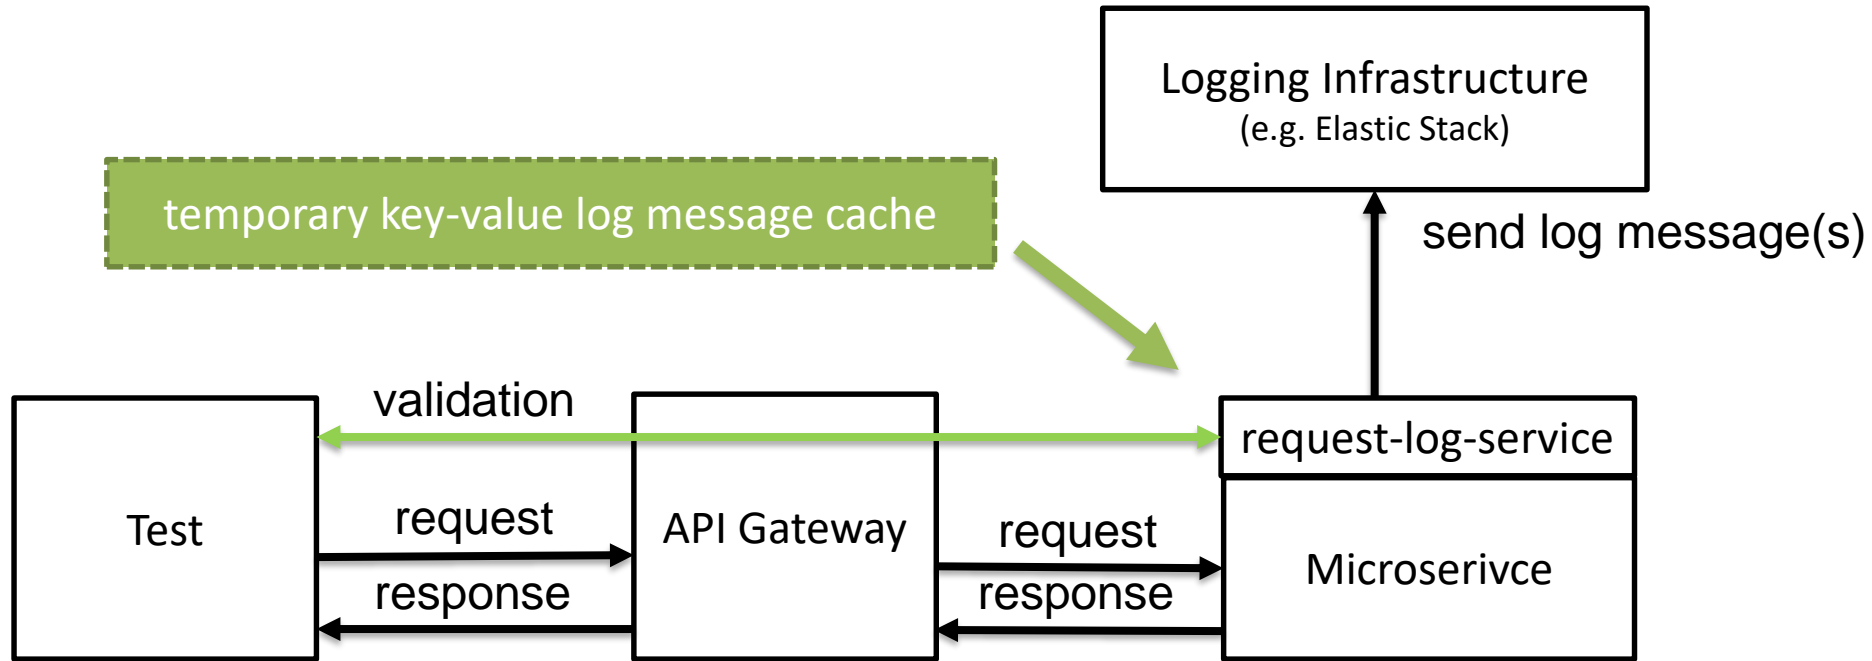

Motivation

How do you write a test against a live application?

Current state of the art

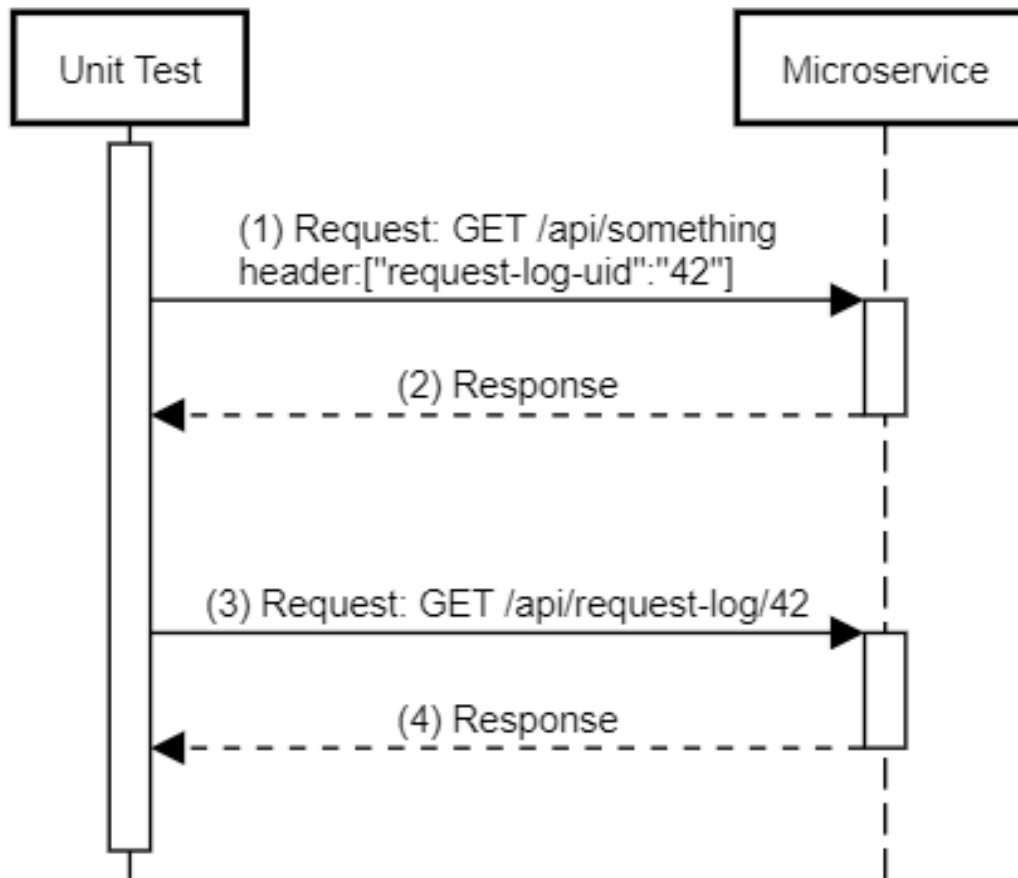

improvement proposal

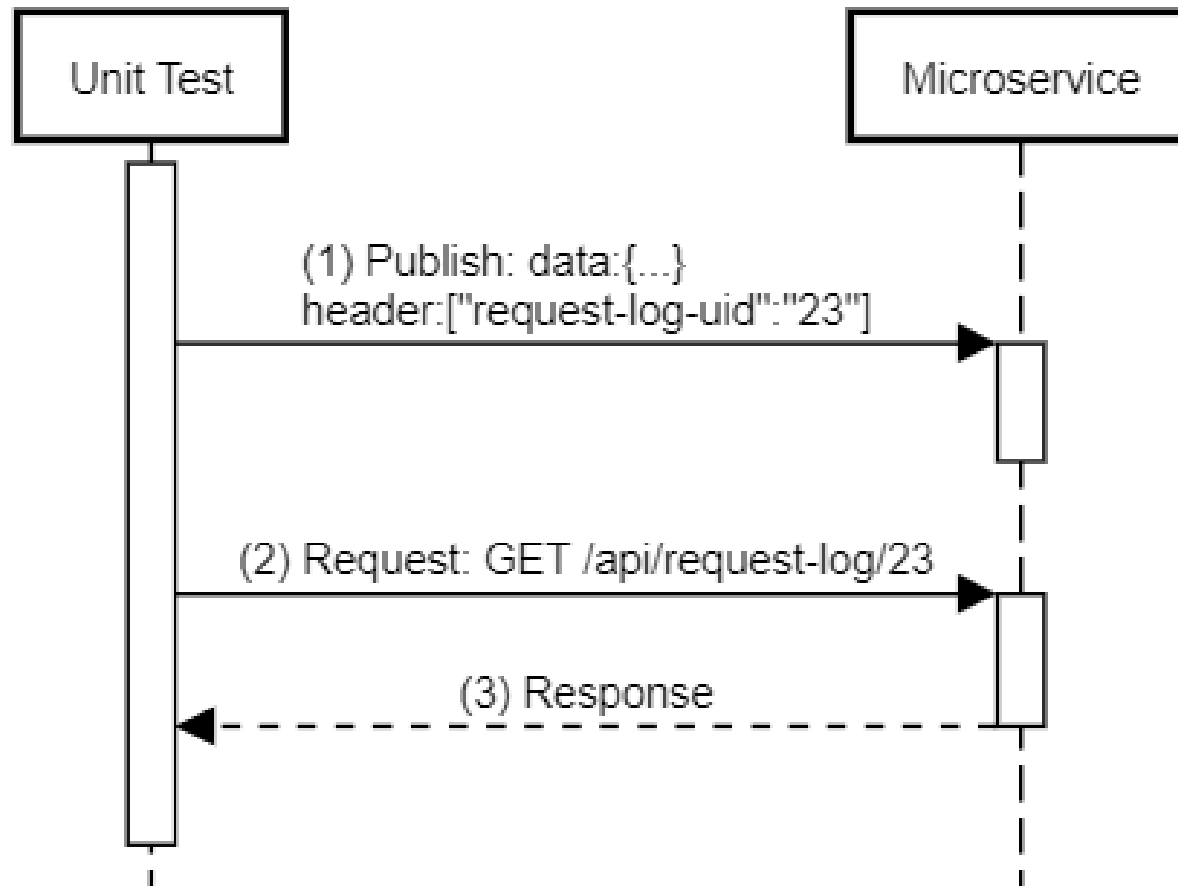

synchronous api / synchronous validation

case 1: synchron/synchron

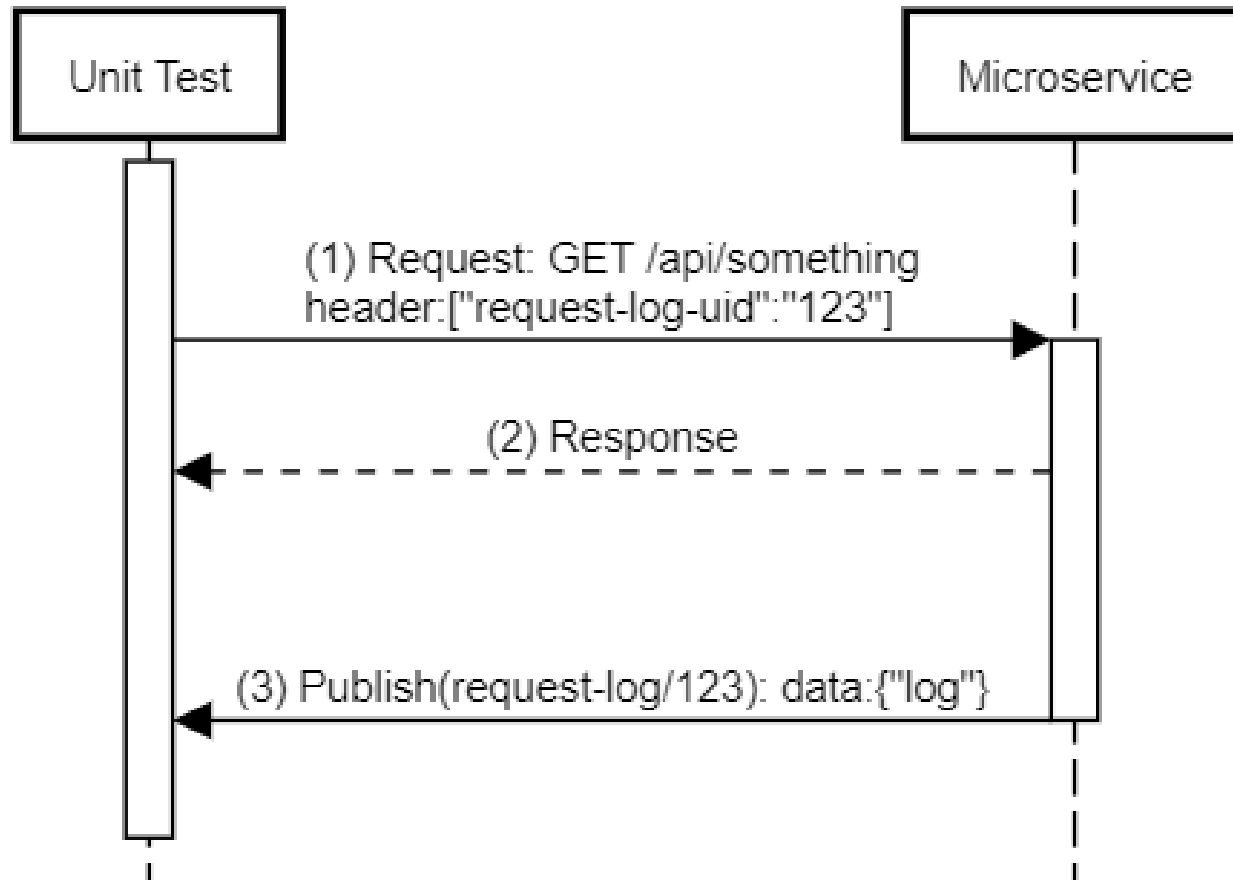

asynchronous api / synchronous validation

case 2: asynchron/synchron

asynchronous api / asynchronous validation

case 3: synchron/asynchron

How would you write a test against a live application now?
